

ACCESSORIES

Accessories for bed head units, medical beams and ceiling pendants are used for retrofitting and enhancement of the utility value. They are modifiable and combinable exactly according to user requirements.

RAMP WITH BAR FOR COMPACT SPRING BALANCED ARMS

Ramps with bars for the compact spring balanced arms SPR10 and SPR11 are a significant help everywhere, where a patient's health condition requires simultaneous use of many medical devices. The medical devices can be fitted on the bar beneath the ramp, thanks to which they are hanging in the air and therefore not taking space on the floor. Its advantage is further the extension of the electrical peripheries. It is possible to place them either on the wall, or on the installed medical beams.

EXAMINATION LED LAMP

A small light with LED chip illumination and cone-shaped shade serves for basic examinations within inpatient rooms. The randomly movable arm is very advantageous. It is not limited by individual joints and therefore enables the user to set the lamp to the most favourable positions.

SHELF WIRE BASKETS

Medical work places require storage areas for surgical instruments and other medical material needed for surgeries or patient care. Shelf systems can be executed as pendant beneath the bed head unit, bridge or rotary complex. Baskets can be combined with the shelf systems based on the needs of the customer. Shelf wire baskets are only available in stainless steel finishing.

MEDICAL RAILS FOR INFUSION AND SHELF BARS

Not only all medical source units can be equipped with universal medical rails, but other specialized medical workplaces can be equipped with them, too. With the use of holders, bearing bars for baskets and infusion hangers, shelves and other accessories can be attached to the rails.

MEDICAL RAILS FOR THE WALLS

Not only all medical source units can be equipped with universal medical rails, but other specialized medical workplaces can be equipped with them, too. With the use of holders, bearing bars for baskets and infusion hangers, shelves and other accessories can be attached to the rails.

MONITOR HOLDER

The monitor holder is used with the holders VESA 75/75 and VESA 100/100 to attach the monitor onto compact spring balanced arms SPR10 and SPR11.

The monitor holder is available as variant with or without a shelf for keyboard and mouse.

HANGING SHELF WITH OR WITHOUT DRAWER, WITH MEDICAL RAILS

Medical departments need, in addition to the supply of medical gases and electricity through ceiling pendants, bed head units and medical beams, storage space for surgical instruments and other medical equipment and material. Shelf systems can be designed as suspension, bridge or swiveling solution. Other mounting possibilities are the medical rails or the rods. Shelf systems can be modified according to the users requirements, load capacity and dimensions of the shelves are selectable. They are available in classic tin design with powder coated surface in color according to the customer or in stainless steel.

SHELF ON MEDICAL RAIL

A shelf on a medical rail is used as swap space for ordinary medical supplies and equipment which is for medical personnel immediately at hand. The shelf can be mounted to standard medical rails.

REFRACTED ARMS

Refracted hangers are a huge help wherever the patients condition requires the use of many devices simultaneously. Apparatuses can be placed on the hangers that are higher in the air and do not take up space on the ground. The refracted arms can hold many other accessories, especially infusion rods, holders for infusion pumps, dispensers and monitors. They can be located both on the wall as well as on already installed end units of medical gases.

INFUSION RACK

Infusion racks serve to support up to four infusion bags and bottles. They can be attached to all types of Medical Beams, Ceiling Pendants and bed head units. Their application is wide and is an integral part of the end units of medical gases in intensive care and other departments.

CABLE HOLDER FOR MEDICAL RAIL

The cable holder with attachment to a medical rail is used to organize cable bundles and oxygen hoses next to medical beds. It is available in two sizes.
